

## INFORMATION FOR AUTHORS

The IEEE TRANSACTIONS ON INDUSTRIAL INFORMATICS is published quarterly. Its focus is on knowledge-based factory automation as a means to enhance industrial fabrication and manufacturing processes. This embraces all collection of techniques that use information analysis, manipulation, and distribution to achieve higher efficiency, effectiveness, reliability, and/or security within the industrial environment. The scope includes reporting, defining, providing a forum for discourse, and informing its readers about the latest developments in intelligent and computer control systems, robotics, factory communications and automation, flexible manufacturing, vision systems, and data acquisition and signal processing. For more information about journal submission and review processes, please visit <http://tii.ieee-ies.org>. To see past journal and conference publications, please visit: <http://tii.ieee-ies.org/IESpublication>.

**Manuscript Types:** Three types of manuscripts are accepted:

- *Regular Papers* - Four to eight journal pages
- *State-of-the-art papers* - with adequate justification the EIC may increase the page limit to 12
- *Special Sections* - Papers focusing on an announced topic with a limit of 8 pages

**Manuscript Submission for Review:** The IEEE Industrial Electronics Society is now employing a Web-based manuscript submission and peer-review tracking system called ScholarOne Manuscripts. Authors must submit their manuscript electronically on the Web to <http://mc.manuscriptcentral.com/tii>. From this entry page, access can be obtained to all information required for the submission of a manuscript. All authors are responsible for understanding these guidelines before submitting their manuscript. Initial Manuscript should be in the standard two-column IEEE format submitted as a PDF file. Names of authors should be removed from the manuscripts for the review process in order to have a fair evaluation of their manuscript. Authors' names and their contact information which are provided to the electronic system will not be visible to reviewers. Manuscripts submitted for consideration should be within the scope of IEEE TRANSACTIONS ON INDUSTRIAL INFORMATICS and should report on new results and previously unpublished material. Authors should pay particular attention to documenting their work in relationship to the currently published work in journal papers. Manuscripts submitted for consideration should report on new results and previously unpublished material. Authors should pay particular attention to documenting their work in relationship to the known literature.

**Submission of Final Manuscript:** For the final production of the paper, please upload a zip file following the instructions found on the following webpage: <http://tii.ieee-ies.org/> in the section titled: "Submission of final version of accepted manuscripts." The zip file should contain: 1) the IEEE formatted PDF file; 2) the manuscript in single column double spaced file. (The Latex format is acceptable.); 3) scanned IEEE Copyright form (PDF) unless submitted electronically through MC; 4) figure or figures in acceptable format; 5) short biographies of each author in .txt format; 6) black-and-white photos of each author in proper graphical format (optional); 7) title, authors, and abstract in .txt format; 8) a separate .txt document describing your response to the last comments you received about your manuscript; and 9) key information about the manuscript including the document ID, document title, document subject, keywords, contact author's full name, complete address of corresponding author, corresponding author's e-mail, corresponding author's phone and fax numbers, co-authors' names, co-authors' IEEE/IES membership status, co-authors' e-mail addresses, and whether authors want to print figures in color. (There will be an extra charge for printing figures in color.) Since all published manuscripts are posted on TII's website, IEEE has created a website where authors can check to see if the PDF versions of their manuscripts comply with TII's website requirements. Authors may upload the final PDF version of their manuscript to IEEE's PDF checker at the following URL: [http://www.ieee.org/publications\\_standards/publications/authors/pdf\\_checker.html](http://www.ieee.org/publications_standards/publications/authors/pdf_checker.html). Log-in with the asked for information (First name, Last name, E-mail address, and verify E-mail address). Then, type in the name of the manuscript, select TRANSACTIONS ON INDUSTRIAL INFORMATICS, and upload the paper. After a few moments, the site will tell the author if the PDF file meets IEEE website requirements. If the PDF fails, the site will tell the author, through e-mail, what issues caused the PDF file to fail.

**Open Access:** This publication is a hybrid journal, allowing either Traditional manuscript submission or Open Access (author-pays OA) manuscript submission. Upon submission, if you choose to have your manuscript be an Open Access article, you commit to pay the discounted \$1,750 OA fee if your manuscript is accepted for publication in order to enable unrestricted public access. Any other application charges (such as over-length page charge and/or charge for the use of color in the print format) will be billed separately once the manuscript formatting is complete but prior to the publication. If you would like your manuscript to be a Traditional submission, your article will be available to qualified subscribers and purchasers via IEEE Xplore. No OA payment is required for Traditional submission. .

**Page Charges:** After a paper has been accepted, the author's organization will be requested to pay US \$110 per printed page to cover part of the publication cost. The page charges are not obligatory nor are their payment a prerequisite for publication. The author will receive 100 reprints without covers if the page charges are honored. Effective August 2005, there will be a mandatory page charge of US \$160 per page in excess of eight pages. Authors are urged to take into this account when submitting and revising papers. Detailed guidelines on page charges will accompany the galley proofs.

## INSTITUTIONAL LISTINGS

The IEEE Industrial Electronics Society invites applications for Institutional Listings from firms interested in electronics and electrical sciences as applied to control, treatment, and measurement of industrial processes. An Institutional Listing recognizes contributions to support the publication the IEEE TRANSACTIONS ON INDUSTRIAL INFORMATICS. Minimum rates are \$75.00 for listing in one issue, or \$200.00 for four consecutive issues. Larger contributions will be most welcome. No agency fee is granted for soliciting contributions. Inquiries, plus instructions on how you wish your institutional listing to appear, should be sent to the Finance Administrator, IEEE Technical Activities, 445 Hoes Lane, Piscataway, NJ 08855-1331.
